

## WINSXS folder cleanup

Voor Windows 7 en Windows 2008 R2 wordt het volgende commando gebruikt:

The following command will remove files needed for uninstallation of service packs. You won't be able to uninstall any currently installed service packs after running this command:

```
DISM.exe /online /Cleanup-Image /SPSuperseded
```

The following command will remove all old versions of every component. You won't be able to uninstall any currently installed service packs or updates after this completes:

```
DISM.exe /online /Cleanup-Image /StartComponentCleanup /ResetBase
```
