

GLPI

After update Warning message like below

Dashboard	Persoonlijk Overzicht	Groepsoverzicht	Globaal overzicht	RSS feeds	Alle
-----------	-----------------------	-----------------	-------------------	-----------	------

- PHP directive "session.cookie_secure" should be set to "on" when GLPI can be accessed on HTTPS protocol.
- PHP directive "session.cookie_httponly" should be set to "on" to prevent client-side script to access cookie values.

Edit the .htaccess file in the root of the GLPI installation and the the lines below.

```
# Special lines for PHP cookie sessions
php_value session.cookie_secure 1
php_value session.cookie_httponly 1
```

Then refresh the browser.
