

# Exchange

## Vergroot de download limit SBS2011 pop3 connector

From the Exchange Powershell run the following This command will display the current size

```
Get-ReceiveConnector | select identity, maxmessagesize
```

This will set the size to 50mb and the timeout to 9 min.

```
Get-ReceiveConnector | Set-ReceiveConnector -MaxMessageSize 50mb -ConnectionInactivityTimeout 00:09:00
```

Then restart transport...

This will set all receive to 50 mb, use with caution!
